PROJECTS

Portfolio Website 	Sep 2024 - Nov 2024
Project Result: Portfolio website	

is a portfolio project in the form of a website that I created based on what I learned and the help of video tutorials that are improvised for other features.

This website has a Theme Mode feature, as well as a scroll to top button that can make the user experience more comfortable and also its Responsive

I created this portfolio using the Vite framework, React Library, CSS, github desktop to control the code, and Vercel to deploy the website itself.

Wheelhub 	May 2024 - Jun 2024
Project Result : A Responsive and Attractive car retail Website	

I contributed to the whole process, and I am responsible for creating the about us section.

Wheelhub is the final project from Bina Nusantara University, which is based on a web-based application. Wheelhub itself is a car retail website.

- Responsive and attractive.
- This website was created using HTML, CSS, and JS (JavaScript)

CLminton 	Oct 2023 - Dec 2023
Project Result : interface Program	

I contributed to the whole process.

CLminton is the final project from Bina Nusantara University, which aims to learn how to create programs to organize products.

- Using Java and MySQL

HooDo 	Jun 2023 - Jul 2023
Project Result: Business Idea Profile, Value Propostion, Pitch Deck, Storyboard, Prototype Project (Figma).	

I contributed to the whole process, and I was responsible for creating the user interface and pitch deck.

Hodo is a platform created for people who are confused about choosing unique and special gifts for relatives or friends who are having birthdays or other events.

HOO comes from Hearfelt, Original, Outstanding, connected with the word Do, which means to do, which means making a gift with sincere feelings, based on the idea of the person giving it, and a unique gift.

Kodev	Jun 2023 - Jul 2023
Project result : Business idea, business system flow and Prototype (Figma).	

I contributed to the whole process, and I was responsible for creating the :

- System Sequence Diagram
- User Interface
- First Cut Sequence Diagram
- Communication Diagram
- Package diagram

Kodev is a website that aims to address this issue by providing consultations with fashion experts, and real-time fashion trend updates.
